Course Description:

Anaesthesia Technical English is a 3 unit course, required for the students of anaesthesia which is to be taken following General English as a prerequisite course.

The main objective is to improve students' ability in reading and understanding texts specified on their field of study. Skills of translation are also being taught, to make students able in translating related text regarding their field of study. There will be group presentations. It is important to cooperate with the group and attend the class on the day of your presentation.

The duration of the course will be 17 weeks, with the last week excluded for final exam, in accordance with the university calendar. With diligent work through the 16 week session, students will be able to make significant progress towards the following objectives:

- Developing reading skills through reading anaesthetic technical reading.
- 2- Increasing knowledge in understanding and applying technical words in relevant situation.
- 3- Enhancing the skills of being in a group and group working.
- 4- Developing confidence in presenting required materials for the class.
- 5- Establishing translation skills through translating the text.
- 6- Identifying grammatical points for comprehending and translating the relevant materials.
